DETAILED ACTION

Drawings

1. The drawings filed July 7, 2003 are accepted.

Allowable Subject Matter

2. **Claims 1-15** are allowed.

The following is a statement of reasons allowance:

As for independent claims 1 and 8, they recite a speech restoration system and method for concealing packet losses. Prior art such as Chen and Aguilar show similar methods and systems, but fails to teach that the unscaled excitation signal is for a voiceless frame and that the scaled excitation signal is for a voiced frame. In particular, Chen nor Aguilar fail to teach wherein the packet loss concealing unit repeats linear prediction coefficients (LPCs) of a last-received valid frame, produces a first excitation signal for the lost frame using a time scale modification (TSM) method, and outputs the first excitation signal to the speech restoring unit, when the lost frame is voiceless, and produces a second excitation signal by re-estimating a gain parameter based on the first excitation signal and outputs the second excitation signal to the speech restoring unit, when the lost frame is voiced.

Dependent claims 2-7 and 9-15 are allowed because they further limit their parent claims.
